

NATHAN THOMAS EMMANUEL GATSE

Data Analyst | Business Intelligence | Reporting & Dashboard Automation

Mechelen, Belgium | +32 465 750 990 | nathangatse@outlook.com

linkedin.com/in/thomasgatse | github.com/mintyfizz

PROFESSIONAL SUMMARY

Applied Data Science student (specialisation: Data Science, Protection & Security) with hands-on experience in SQL, Python, dbt and BI tooling. Built a Databricks lakehouse integrating 21 countries and 34 years of trade data, and a dbt-tested PostgreSQL warehouse with automated weekly refreshes feeding Metabase dashboards. Prior audit internship in Excel financial consolidation and data-quality control. Seeking a data analytics, business intelligence or reporting internship from January 2027.

TECHNICAL SKILLS

Programming & Query: Python (pandas, NumPy), SQL, Bash

Data Engineering: dbt, Apache Airflow, Prefect, Databricks, Delta Lake, ETL/ELT pipeline design, dimensional modelling (star schema), data quality testing

Databases & Warehousing: PostgreSQL, data warehousing, lakehouse and medallion (bronze/silver/gold) architecture

BI & Reporting: Power BI, Metabase, Microsoft Excel (Power Query, pivot tables, financial consolidation), KPI dashboards, automated reporting, data visualisation

Tools & Methods: Git, GitHub Actions (CI/CD), Docker, REST APIs, requirements gathering, stakeholder communication, Agile teamwork

Languages: English (fluent), French (fluent), Dutch (elementary)

PROFESSIONAL EXPERIENCE

Audit Intern — Exco CACOGES

2020

Brazzaville, Republic of the Congo

- Analysed financial records across multiple client accounts, identifying inconsistencies and reconciliation errors that improved the reliability of reported figures.
- Built and maintained Excel consolidation models used to aggregate multi-entity financial data for internal audit review.
- Supported risk assessment procedures under senior auditor supervision, documenting findings for client reporting.

DATA & ANALYTICS PROJECTS

CEMAC-ECOWAS-AES Trade Observatory

github.com/mintyfizz/cemac-ecowas-aes-trade-observatory

Python, SQL, Databricks, Delta Lake, dimensional modelling, GitHub Actions

- Designed and built a Databricks lakehouse covering 21 African countries and 34 years of trade history (1990–2024), integrating IMF, UN Comtrade, ACLED and fragility datasets.
- Modelled bronze, silver and gold Delta tables with a star-schema gold layer, applying automated data-quality checks at each stage.
- Automated validated JSON exports to a public dashboard via a GitHub Actions CI/CD pipeline, eliminating manual refresh work.

CEMAC Digital Readiness Pipeline

github.com/mintyfizz/cemac-data-observatory

Python, SQL, PostgreSQL, dbt, Prefect, Metabase, Docker, World Bank API

- Engineered an end-to-end ELT pipeline ingesting 10 World Bank indicators across 8 countries, benchmarking 6 CEMAC economies against Rwanda and Kenya.
- Built a dbt-tested PostgreSQL warehouse with schema and data-quality tests, orchestrated by Prefect on an automated weekly schedule.
- Delivered Metabase dashboards translating raw indicator data into comparative readiness KPIs for non-technical readers.

4VISO — Pharmaceutical Logistics Compliance Platform

Team project

Client-facing consulting project — requirements analysis, prototyping

- Built a working prototype supporting shipment tracking and Good Distribution Practice (GDP) audit workflows for pharmaceutical logistics.
- Translated regulatory compliance requirements into product features while collaborating directly with the client team.

EDUCATION

Thomas More University of Applied Sciences — Mechelen, Belgium

Feb 2025 – Aug 2027 (expected)

Professional Bachelor in Applied Data Science — Specialisation: Data Science, Protection & Security

KU Leuven — Belgium

2023 – 2024

Bachelor of Business Engineering — coursework completed, transferred to Thomas More

St. John's International School — Waterloo, Belgium

2021 – 2023

International Baccalaureate (IB) Diploma

CERTIFICATIONS & AVAILABILITY

DataCamp Data Engineer Associate (2026) | Google Data Analytics Professional Certificate (2025)

Internship availability: January/February – May/June 2027 | School internship agreement available
